SKILLS

- C# / .NET, JavaScript, ReactJS, Azure, SQL, MongoDB.
- Microservices, Backend, Frontend, Git, Kafka, Redis, AI, Scraping.

WORK EXPERIENCE

Behamics: Core Team Backend Developer 10/2024 – Present

- Led development of [Behamics Autonomous Scraper](#), a project for scraping all products info of any ecommerce by ONLY url using Javascript, Puppeteer and AI which, this project finished in less than 3 months.
- Designed and implemented the process, navigating from the homepage to categories to product pages to cart, scraping categories, product links and product details automatically with the help of AI.
- Built [CloudLayer](#) a no-code cloud automation platform enabling one-click infrastructure provisioning, CI/CD deployment, and cost optimization—achieving up to 40% reduction in multi-cloud expenses.

Gjirafa, Inc: Backend Developer 04/2023 – 10/2024

- Worked on [Gjirafa50.com](#), the crucial project of the company which generated \$16 million in revenue in 2024.
- Using C# and Redis, reduced product page (Admin side) loading time from 22s to <2s, saving much time to the content team and saving thousands of dollars.
- I implemented backend for the entirely new design of homepage, category and subcategory page of gjirafa50
- Developed APIs for the new, performant and most beautiful emails.
- Implemented the backend for the new profile section.
- Applied advanced caching strategies with Redis and Kafka; ensured reliable CI/CD with Azure DevOps.
- Worked on [Trexty.com](#), a powerful SaaS platform for real-time transcription of videos and streams in Indonesian, Albanian and more languages.
- On Trexty implemented streaming and video processing, timestamps and scalable architecture with microservices, RabbitMQ, SignalR and Redis.
- Designed the full transcription process as well as database schema using EF Core and PostgreSQL
- We used advanced AI to provide fast and accurate transcription.
- Within 2 months created an internal competitor scraping tool using C#, Hangfire, MsSQL and Selenium.

Gjirafa, Inc: Backend Developer *Apprentice* 05/2022 – 03/2023

- Ranked 2nd out of 92 apprentices (Top 2%)
- Together with the team created an ecommerce backend with C#, implemented the email notification with SendGrid, product search feature using Elasticsearch as well as RabbitMQ for microservices communication.
- Shortly worked on a funding project where I used ReactJS for implementing the donation page and user profile section.

EDUCATION

University of Business and Technology 10/2021 – 12/2024

B.S. Computer Science and Engineering

Cumulative GPA: 3.92/4.0

Relevant Coursework: Lab 1 and Lab 2 (C# and ReactJS), Data Structures and Algorithms, Operating Systems, Architecture and Organization of Computers, Artificial Intelligence, Mobile App Development, Software Engineering, User Experience/User Interfaces, Object-Oriented Programming
